Subject index*

A

Acetate, effect on ketogenesis during hemodialysis, 98

Adenine phosphoribosyltransferase in disorders of purine and pyrimidine metabolism, 163

Adenosine- and deoxyadenosine-mediated altered pyrimidine metabolism in human adenosine deaminase–deficient lymphoblasts, 731

-3′,5′ monophosphate; *see* Cyclic AMP

Age, effect on total body nitrogen in health and disease, 917

Alanine, gluconeogenesis from, in perfused rat liver, interrelation between effects of ethanol and thryoid hormones on, 746

Allergic bronchopulmonary aspergillosis, ELISA in diagnosis of, 288

Allogeneic bone marrow transplantation as long-term enzyme replacement therapy in β-glucuronidase–deficient mice, 792

Alpha chains, excess, in β-thalassemia, proteolysis of, 754

$Alpha_1$ protease inhibitor, functional, produced by human hepatoma cell line, 108

Aluminum, histological quantitation of, in iliac bone from patients with renal failure, 206

Alveolar macrophages, guinea pig, phagocytosis by, relation of respiratory burst to arachidonate metabolism during, 908

Po_2, reduced, relation with collagen biosynthesis in perfused rat lung, 442

Amino acids, basic, and aminoglycosides, effect on ^{3}H-gentamicin uptake in cortical slices of rat and human kidney, 156

Aminoglycoside(s) and basic amino acids, effect on ^{3}H-gentamicin uptake in cortical slices of rat and human kidney, 156

nephrotoxicity—tale of two transports, 148

Amyloid, degradation by serum component and inhibition of degradation: dynamic concept of amyloid deposition, 693

deposition, dynamic concept of: degradation of amyloid by serum component and inhibition of degradation, 693

Androgens, synthetic, and testosterone improving in vitro survival of human marrow progenitor cells in serum-free suspension cultures, 247

Angiotensin infusion, effect on extrarenal erythropoietin production, 520

Animal model of occupational immunologic asthma due to diphenylmethane diisocyanate, with multiple systemic immunologic responses, 615

Another transition! So soon, 788

Antibody(ies), anti-insulin receptor, detection of, and insulin modulation of antibody-dependent cytotoxicity, 39

-dependent cytotoxicity, insulin modulation of, and detection of antireceptor antibodies, 39

Antigenic reactivity, abnormal, of factor VIII/von Willebrand factor subunit in variants of von Willebrand's disease, 481

Antihypertensive neutral renomedullary lipid, derivation from renal venous effluent, 64

Anti-insulin receptor antibodies, detection of, and insulin modulation of antibody-dependent cytotoxicity, 39

Antiplatelet drugs, and defibrinating agent, effects on experimental glomerulonephritis in rats, 428

Antisera, rough mutant (Re), opsonization of serum-sensitive and serum-resistant *Escherichia coli* by, 197

Arachidonate metabolism, relation to respiratory burst during phagocytosis by guinea pig alveolar macrophages, 908

*January, pp. 1-138; February, pp. 139-298; March, pp. 299-450; April, pp. 451-600; May, pp. 601-754; June, pp. 755-944.

Aspergillosis, bronchopulmonary allergic, ELISA in diagnosis of, 288
Asthma, occupational, 611
immunologic, due to diphenylmethane diisocyanate, animal model of, 615
Athymic nude mice, glomerular immune complex formation and lymphoma induction in, by Crohn's disease tissue filtrates, 827

B

B cells, sensitive, circulating, in multiple myeloma, enhanced T cell suppression directed toward, 512
Baboons fed chenodeoxycholate, lithocholate metabolism in, 533
Beta-thalassemia, severe heterozygous, abnormal red cell membrane proteolytic activity in, 263
Bile acids in human female: effects of contraceptive steroids, 798
bilirubin monoglucuronide and diglucuronide isolation from, simple procedure, 539
flow in nonhuman primates, effect of elevated biliary tract pressure on, 342
salts, effects on radioimmunoassay of hormonal peptides, 740
Biliary cirrhosis, primary, IgM in, physicochemical and complement activating properties, 636
lipid(s), bile acids, and gallbladder function in human female: effects of contraceptive steroids, 798
metabolism and bile flow in nonhuman primates, effect of elevated biliary tract pressure on, 342
secretion of protoporphyrin in isolated, in situ–perfused rat liver, 885
tract pressure, elevated, effect on biliary lipid metabolism and bile flow in nonhuman primates, 342
Bilirubin monoglucuronide and diglucuronide, isolation from bile, simple procedure, 539
Blood flow, splanchnic, estimated, effects of digitalis on, 84
peripheral; *see* Peripheral blood
Bone marrow transplantation, allogeneic, as long-term enzyme replacement therapy in β-glucuronidase–deficient mice, 792
Borrelia spirochetes interaction with human mononuclear leukocytes causing production of leukocytic pyrogen and thromboplastin, 709
Broad beta disease, catabolism of very-low-density lipoproteins, compared with endogenous hypertriglyceridemia, 15
Bronchopulmonary aspergillosis, allergic, ELISA in diagnosis of, 288

C

C1q-latex assay: complexes that react with both C1q and monoclonal rheumatoid factor in lupus erythematosus and lung cancer, 678
Caffeine, effect on calcium balance in women, 46
Calcium balance in women, effects of nitrogen, phosphorus, and caffeine on, 46
mobilization in renal inner medulla, effects of hyperosmolality on: relation to alterations in prostaglandin E synthesis, 806
transport, tubular, effects of phosphate administration on, 317
Cancer, lung, complexes that react with both C1q and monoclonal rheumatoid factor in, C1q-latex assay for, 678
Catabolism of very-low-density lipoproteins in broad beta disease: comparison with endogenous hypertriglyceridemia, 15
Catalytic rate, enzyme, increased, gout with superactive phosphoribosylpyrophosphate synthetase due to, 495
Cell(s) lines, hepatoma, human, functional alpha$_1$ protease inhibitor produced by, 108; *see also* specific cells
lymphoid, protein kinase activities contrasted with normal peripheral blood lymphocyte subpopulations, 56
mammalian, genetic engineering of, potential application to genetic diseases of man, 299
normal (AA) and sickled (SS), density-separated cohorts of, membrane-bound hemichrome in, 25
Cerebral edema, cerebral vessels in, effects of nerves on, 139
vessels in stroke, cerebral edema, and hypertension, effects of nerves on, 139
Chemotactic activity, decreased, in activated newborn plasma, role of higher levels of chemotactic factor inactivator and lower levels of complement, 331
factor inactivator, higher levels in decreased chemotactic activity in activated newborn plasma, 331
Chenodeoxycholate, baboons fed, lithocholate metabolism in, 533
Cilia, immotile, syndrome, neutrophil function in, 838
Circulating fibrin in familial Mediterranean fever, evidence for, 559
Cirrhosis, biliary, primary, IgM in, physicochemical and complement activating properties, 636
hepatic, platelets, fibrinogen, and plasminogen in, kinetic and functional studies of, 217
Collagen biosynthesis, relation to reduced alveolar Po_2 in perfused rat lung, 442
Complement activating properties of IgM in primary biliary cirrhosis, 636
lower levels in decreased chemotactic activity in activated newborn plasma, 331
Contraceptive(s), oral, women using, cold-promoted activation of factor VII and spontaneous shortening of prothrombin time in, role of augmented Hageman factor (factor XII) titers in, 363
steroids, effects on biliary lipids, bile salts, and gallbladder function in human female, 798

Cortical slices of rat and human kidney, ^{3}H-gentamicin uptake in, effect of basic amino acids and aminoglycosides on, 156
Crohn's disease tissue filtrates, glomerular immune complex formation and lymphoma induction in athymic nude mice by, 827
Crystal formation, effect of triamterene and its metabolites on, in triamterene urolithiasis, 254
Cyclic AMP system, vasopressin-sensitive, in rat outer medullary tubules, effect of potassium depletion on, 29
Cytomegalovirus, human, isolated from peripheral blood T cells of renal transplant patients, 92
Cytotoxicity, antibody-dependent, insulin modulation of, and detection of anti-insulin receptor antibodies, 39
of glycolipid region of streptococcal lipoteichoic acid for cultures of human heart cells, 118

D

Defibrinating agent and antiplatelet drugs, effects on experimental glomerulonephritis in rats, 428
Deformability, filtration, of rabbit pulmonary macrophage, 568
Degradation and oxidation of methionine enkephalin by human neutrophils, 418
Density-separated cohorts of normal (AA) and sickled (SS) cells, membrane-bound hemichrome in, 25
Deoxyribonucleic acid; *see* DNA
Deoxyadenosine-mediated altered pyrimidine metabolism in human adenosine deaminase–deficient lymphoblasts, 731
Diabetes mellitus, insulin-dependent, hypoglycemic glucose counterregulation in, 451
specific immunoregulation abnormality in, 175
Diaphragm in health and disease, 601
Digitalis, effects on estimated splanchnic blood flow, 84
Diglucuronide and monoglucuronide, bilirubin, isolation from bile, simple procedure, 539
Diphenylmethane diisocyanate causing occupational immunologic asthma, animal model having multiple systemic immunologic responses, 615
Dipyridamole and prostacyclin, effect on rabbit platelet adherence in vitro and in vivo, 548
Diuresis, saline, free water absorption during, in enterococcal pyelonephritis in rats, 474
water, and diuretic drugs, effects on mercuric chloride–induced acute renal failure in rat, 646
DNA–anti-DNA complexes dissociated in interaction of DNA with lactoferrin, 127
binding results, effect of incomplete double strandedness of test DNA on, 410
DNA—cont'd
interaction with lactoferrin, preferential reactivity with double-stranded DNA and dissociation of DNA–anti-DNA complexes, 127
test, incomplete double strandedness of, effect on DNA binding results, 410
Double-stranded DNA, preferential reactivity with lactoferrin, 127
Double strandedness, incomplete, of test DNA, effect on DNA binding results, 410
Drugs, diuretic, effects on mercuric chloride–induced acute renal failure in rat, 646

E

Edema, cerebral, cerebral vessels in, effects of nerves on, 139
ELISA, application in diagnosis of allergic bronchopulmonary aspergillosis, 288
Endogenous hypertriglyceridemia, catabolism of very-low-density lipoproteins in, compared with broad beta disease, 15
Enterococcal pyelonephritis, experimental, in rats, free water reabsorption during saline diuresis in, 474
Enzyme catalytic rate, increased, gout with superactive phosphoribosylpyrophosphate synthetase due to, 495
-linked immunosorbent assay; *see* ELISA
replacement therapy, long-term, in β-glucuronidase–deficient mice by allogeneic bone marrow transplantation, 792
Erythrocyte-bound IgG, interaction with ^{125}I–protein A, 399
membrane, abnormal proteolytic activity in severe heterozygous β-thalassemia, 263
abnormalities in heterozygous variant of hereditary plasma lecithin–cholesterol acyl transferase deficiency, 816
Erythropoietin production, extrarenal, effect of angiotensin infusion on, 520
radioimmunoassay of circulating levels in normal and polycythemic humans, 624
Escherichia coli, serum-sensitive and serum-resistant, opsonization by rough mutant (Re) antisera, 197
Ethanol and thyroid hormones, effects on gluconeogenesis from alanine in perfused rat liver, interrelation between, 746
Extrarenal erythropoietin production, effect of angiotensin infusion on, 520

F

Factor VII, cold-promoted activation in women using oral contraceptives, role of augmented Hageman factor (factor XII) titers in, 363
VIII/von Willebrand factor subunit, abnormal antigenic reactivity in variants of von Willebrand's disease, 481
XII, augmented titers of, role in cold-promoted activation of factor VII and spontaneous shortening of prothrombin time in women using oral contraceptives, 363

Familial Mediterranean fever, evidence for circulating fibrin in, 559
Feedback, tubuloglomerular, signal for activation of, 722
Fibrin, circulating, in familial Mediterranean fever, evidence for, 559
Fibrinogen in hepatic cirrhosis, kinetic and functional studies of, 217
Fibroblast procoagulant activity, mononuclear cell modulation of, 657
Filtration deformability of rabbit pulmonary macrophage, 568

G

Galactose metabolism, inherited disorders of, new method of screening for, 895
Gallbladder function in human female, effects of contraceptive steroids, 798
Genetic engineering of mammalian cells: its potential application to genetic diseases of man, 299
Glomerular immune complex formation and induction of lymphoma in athymic nude mice by Crohn's disease tissue filtrates, 827
Glomerulonephritis, current problems and understanding, 755
  experimental, in rats, effects of antiplatelet drugs and defibrinating agent on, 428
Glucagon-stimulated glucose output, impaired, in livers of acutely uremic rats, 669
  and vasoactive intestinal peptide, immunoreactivities in leukocytes from leukemic patients, 294, 295, 297
Gluconeogenesis from alanine in perfused rat liver, interrelation between effects of ethanol and thyroid hormones on, 746
Glucose counterregulation, hypoglycemic, in insulin-dependent diabetes mellitus, 451
  output, glucagon-stimulated, impaired in livers of acutely uremic rats, 669
β-Glucuronidase–deficient mice, long-term enzyme replacement therapy by allogeneic bone marrow transplantation, 792
Glycolipid region of streptococcal lipoteichoic acid, cytotoxicity for cultures of human heart cells, 118
Gout with superactive phosphoribosylpyrophosphate synthetase due to increased enzyme catalytic rate, 495
Guinea pig alveolar macrophages, phagocytosis by, relation of respiratory burst to arachidonate metabolism during, 908

H

^{3}H-gentamicin uptake in cortical slices of rat and human kidney, effect of basic amino acids and aminoglycosides on, 156
Hageman factor; *see* factor XII
Heart cells, human, cultures of, cytotoxicity of glycolipid region of streptococcal lipoteichoic acid for, 118
Height, effect on total body nitrogen in health and disease, 917
Hemichrome, membrane-bound, in density-separated cohorts of normal (AA) and sickled (SS) cells, 25
Hemodialysis, ketogenesis during, effect of acetate on, 98
Hepatic; *see* Liver
Hepatoma cell line, human, functional alpha$_1$ protease inhibitor produced by, 108
Hereditary partial myeloperoxidase deficiency, characterization of, 589
  plasma lecithin–cholesterol acyl transferase deficiency: heterozygous variant with erythrocyte membrane abnormalities, 816
$HgCl_2$; *see* Mercuric chloride
Histological quantitation of aluminum in iliac bone from patients with renal failure, 206
Hodgkin's disease, serum lactic dehydrogenase level in, prognostic value of, 382
Hormone(s), parathyroid, inducing alterations in renal tubular water transport: antidiuretic hormone–mediated and independent effects, 457
  metabolism and radioimmunoassay of, current concepts, 309
  thyroid, and ethanol, effects on gluconeogenesis from alanine in perfused rat liver, interrelation between, 746
  formation catalyzed by human thyroid peroxidase: new and physiological measurement of thyroid peroxidase, 580
Hormonal peptides, radioimmunoassay of, effects of bile salts on, 740
Human adenosine deaminase–deficient lymphoblasts, pyrimidine metabolism in, altered, adenosine- and deoxyadenosine-mediated, 731
  cytomegalovirus isolated from peripheral blood T cells of renal transplant patients, 92
  female, biliary lipids, bile acids, and gallbladder function in, effects of contraceptive steroids, 798; *see also* Women
  genetic diseases, potential application of genetic engineering of mammalian cells to, 299
  heart cells, cultures of, cytotoxicity of glycolipid region of streptococcal lipoteichoic acid for, 118
  hepatoma cell line, functional alpha$_1$ protease inhibitor produced by, 108
  marrow progenitor cells, testosterone and synthetic androgen improving in vitro survival in serum-free suspension cultures, 247
  mononuclear leukocytes interaction with *Borrelia* spirochetes causing production of leukocytic pyrogen and thromboplastin, 709
  neutrophils, degradation and oxidation of methionine enkephalin by, 418
  peripheral blood monocytes, specific binding of thrombin by, 873
  plasma, very low levels of 6-keto-prostaglandin $F_{1\alpha}$ in, 388

Human --cont'd
platelet prostaglandin synthetase, radioimmune assay of, 187
and rat kidney, cortical slices of, ^{3}H-gentamicin uptake in, effect of basic amino acids and aminoglycosides on, 156
thyroid peroxidase catalyzing formation of thyroid hormone: new and physiological measurement of thyroid peroxidase, 580
Humans, dual system of intestinal thiamine transport in, 701
normal and polycythemic, circulating levels of erythropoietin in, radioimmunoassay for, 624
Humoral factors, role in psoriasis, 275
25-Hydroxyvitamin D, urinary excretion of, in health and nephrotic syndrome, 325
Hyperosmolality, effects on calcium mobilization in renal inner medulla: relation to alterations in prostaglandin E synthesis, 806
Hypertension, cerebral vessels in, effects of nerves on, 139
lead, and renin-angiotensin system in rats, 354
saline deoxycorticosterone acetate (Doca), in rat, lithium preventing, 231
Hypertriglyceridemia, endogenous, catabolism of very-low-density lipoproteins in, compared with broad beta disease, 15
Hypoglycemic glucose counterregulation in insulin-dependent diabetes mellitus, 451

I

^{125}I–protein A, interaction with erythrocyte-bound IgG, 399
IgG, erythrocyte-bound, interaction with ^{125}I–protein A, 399
IgM in primary biliary cirrhosis, physicochemical and complement activating properties, 636
IgM-λ pyroglobulin, structural studies on, 845
Iliac bone of patients with renal failure, aluminum in, histological quantitation of, 206
Immotile cilia syndrome, neutrophil function in, 838
Immune complex, glomerular, formation in athymic nude mice by Crohn's disease tissue filtrates, 827
–like material, circulating, in liver cirrhosis and septicemia, polyethylene glycol precipitation and particle-counting immunoassay for detecting, 852
Immunoassay, particle-counting, for detecting circulating immune complex–like material in liver cirrhosis and septicemia, 852
Immunologic asthma, occupational, due to diphenylmethane diisocyanate, animal model of, 615
Immunoregulation abnormality in insulin-dependent diabetes mellitus, 175
Immunosuppressive activity of succinylacetone, 526
Inherited disorders of galactose metabolism, new method of screening for, 895; *see also* Hereditary entries
Insulin-dependent diabetes mellitus, hypoglycemic glucose counterregulation in, 451
specific immunoregulation abnormalitiy in, 175
modulation of antibody-dependent cytotoxicity and detection of anti-insulin receptor antibodies, 39
Intestinal thiamine transport, dual system of, in humans, 701

K

Ketogenesis during hemodialysis, effect of acetate on, 98
6-Keto-prostaglandin $F_{1\alpha}$ in human plasma, very low levels of, 388
Kidney failure, acute, in rat, mercuric chloride–induced: effects of water diuresis, saline loading, and diuretic drugs, 646
iliac bone from patients with, aluminum in, histological quantitation of, 206
function throughout rabbit pregnancy, 239
inner medulla, calcium mobilization in, effects of hyperosmolality on: relation to alterations in prostaglandin E synthesis, 806
rat and human, cortical slices of, ^{3}H-gentamicin uptake in, effect of basic amino acids and aminoglycosides on, 156
transplant patients, peripheral blood T cells of, isolation of human cytomegalovirus from, 92
tubular water transport, alterations in, induced by parathyroid hormone: both antidiuretic hormone–mediated and independent effects, 457
venous effluent, antihypertensive neutral renomedullary lipid derived from, 64
Kinetic and functional studies of platelets, fibrinogen, and plasminogen in hepatic cirrhosis, 217

L

Lactic dehydrogenase level, serum, in Hodgkin's disease, prognostic value of, 382
Lactoferrin interaction with DNA, preferential reactivity with double-stranded DNA and dissociation of DNA–anti-DNA complexes, 127
systemic infusion of, neutropenia induced by, 866
Lead, hypertension, and renin-angiotensin system in rats, 354
Lecithin–cholesterol acyl transferase, plasma, hereditary deficiency: heterozygous variant with erythrocyte membrane abnormalities, 816
Leukemic patients, leukocytes from, immunoreactivities of vasoactive intestinal peptide and glucagon in, 294, 295, 297

Leukocytes from leukemic patients, immunoreactivities of vasoactive intestinal peptide and glucagon in, 294, 295, 297
mononuclear, human, interaction with *Borrelia* spirochetes causing production of leukocytic pyrogen and thromboplastin, 709
Leukocytic pyrogen, production of, interaction of *Borrelia* spirochetes with human mononuclear leukocytes causing, 709
Lipid(s), bile acids, and gallbladder function in human female: effects of contraceptive steroids, 798
biliary, metabolism and bile flow in nonhuman primates, effect of elevated biliary tract pressure on, 342
renomedullary, antihypertensive neutral, derived from renal venous effluent, 64
Lipoproteins, very-low-density, catabolism in broad beta disease, compared with endogenous hypertriglyceridemia, 15
Lipoteichoic acid, streptococcal, glycolipid region of, cytotoxicity for cultures of human heart cells, 118
Lithium preventing saline deoxycorticosterone acetate (Doca) hypertension in rat, 231
Lithocholate metabolism in baboons fed chenodeoxycholate, 533
Liver(s) cirrhosis, platelets, fibrinogen, and plasminogen in, kinetic and functional studies of, 217
and septicemia, circulating immune complex–like material in, polyethylene glycol precipitation and particle counting immunoassay for detecting, 852
clearance and biliary secretion of protoporphyrin in isolated, in situ–perfused rat liver, 885
rat(s) (acutely uremic), impaired glucagon-stimulated glucose output in, 669
isolated, in situ–perfused, hepatic clearance and biliary secretion of protoporphyrin in, 885
perfused, gluconeogenesis from alanine in, interrelation between effects of ethanol and thyroid hormones on, 746
Lung cancer, complexes that react with both C1q and monoclonal rheumatoid factor in, C1q-latex assay for, 678
rat, perfused, relation between reduced alveolar Po_2 and collagen biosynthesis in, 442
Lupus erythematosus, complexes that react with both C1q and monoclonal rheumatoid factor in, C1q-latex assay for, 678
Lymphoblasts, adenosine deaminase–deficient, human, pyrimidine metabolism in, altered, adenosine- and deoxyadenosine-mediated alteration in, 731
Lymphocyte cultures, mixed, monocyte-depleted, lysozyme stimulating lymphocyte proliferation in, 370
proliferation in monocyte-depleted mixed lymphocyte cultures, lysozyme stimulating, 370
Lymphocyte—cont'd
subpopulations of normal peripheral blood, protein kinase activities contrasted with lymphoid cell lines, 56
Lymphoid cell lines, protein kinase activities contrasted with normal peripheral blood lymphocyte subpopulations, 56
Lymphoma, induction in athymic nude mice by Crohn's disease tissue filtrates, 827
Lysozyme stimulating lymphocyte proliferation in monocyte-depleted mixed lymphocyte cultures, 370

M

Macrophage(s), alveolar, guinea pig, phagocytosis by, relation of respiratory burst to arachidonate metabolism during, 908
pulmonary, rabbit, filtration deformability of, 568
Mammalian cells, genetic engineering of: potential application to genetic diseases of man, 299
Man; *see* Human
Marrow, bone, allogeneic transplantation, long-term enzyme replacement therapy in β-glucuronidase–deficient mice by, 792
progenitor cells, human, testosterone and synthetic androgens improving in vitro survival in serum-free suspension cultures, 247
Matrix binding of triamterene and its metabolites in triamterene urolithiasis, 254
Medullary tubules, outer, rat, vasopressin-sensitive cyclic AMP system in, effect of potassium depletion on, 29
Membrane-bound hemichrome in density-separated cohorts of normal (AA) and sickled (SS) cells, 25
erythrocyte, abnormalities, heterozygous variant of plasma lecithin-cholesterol acyl transferase deficiency with, 816
Mercuric chloride–induced acute renal failure in rat: effects of water diuresis, saline loading, and diuretic drugs, 646
Metabolism, arachidonate, relation to respiratory burst during phagocytosis by guinea pig alveolar macrophages, 908
biliary lipid, in nonhuman primates, effect of elevated biliary tract pressure on, 342
galactose, inherited disorders of, new method of screening for, 895
lithocholate, in baboons fed chenodeoxycholate, 533
purine and pyrimidine, disorders of, adenine phosphoribosyltransferase in, 163
pyrimidine, altered, adenosine- and deoxyadenosine-mediated, in human adenosine deaminase–deficient lymphoblasts, 731
and radioimmunoassay of parathyroid hormone, current concepts, 309

Metabolites of triamterene: solubility, pK, effect on crystal formation, and matrix binding in triamterene urolithiasis, 254
Methionine enkephalin, degradation and oxidation of, by human neutrophils, 418
Monoclonal rheumatoid factor and C1q, complexes that interact with, in lupus erythematosus and lung cancer, C1q-latex assay for, 678
Monocyte-depleted mixed lymphocyte cultures, lysozyme stimulating lymphocyte proliferation in, 370
human peripheral blood, specific binding of thrombin by, 873
Monoglucuronide and diglucuronide, bilirubin, isolation from bile, simple procedure, 539
Mononuclear cell nodulation of fibroblast procoagulant activity, 657
leukocytes, human, interaction with *Borrelia* spirochetes causing production of leukocytic pyrogen and thromboplastin, 709
Mouse (mice), athymic nude, glomerular immune complex formation and lymphoma induction in, by Crohn's disease tissue filtrates, 827
β-glucuronidase–deficient, long-term enzyme replacement therapy by allogeneic bone marrow transplantation, 792
Myeloma, multiple, sensitive circulating B cells in, enhanced T cell suppression directed toward, 512
Myeloperoxidase deficiency, partial, hereditary, 589

N

Nephrotic syndrome, urinary excretion of 25-hydroxyvitamin D in, 325
Nephrotoxicity, aminoglycoside—tale of two transports, 148
Nerves, effects on cerebral vessels in stroke, cerebral edema, and hypertension, 139
Neutropenia induced by systemic infusion of lactoferrin, 866
Neutrophil(s) function in immotile cilia syndrome, 838
human, degradation and oxidation of methionine enkephalin by, 418
Newborn plasma, activated, decreased chemotactic activity in, role of higher levels of chemotactic factor inactivator and lower levels of complement, 331
Nitrogen, phosphorus, and caffeine, effects on calcium balance in women, 46
total body, in health and disease: effects of age, height, weight, and sex, 917
Nonhuman primates, biliary lipid metabolism and bile flow in, effect of elevated biliary tract pressure on, 342

O

Occupational asthma, 611
Occupational asthma—cont'd
immunologic, due to diphenylmethane diisocyanate, animal model of, with multiple systemic immunologic responses, 615
One year later: reflections and prospects, 1
Opsonization of serum-sensitive and serum-resistant *Escherichia coli* by rough mutant (Re) antisera, 197
Oxidation and degradation of methionine enkephalin by human neutrophils, 418

P

Parathyroid hormone inducing alterations in renal tubular water transport: antidiuretic hormone–mediated and independent effects, 457
metabolism and radioimmunoassay of, current concepts, 309
Particle-counting immunoassay for detecting circulating immune complex–like material in liver cirrhosis and septicemia, 852
Peptides, hormonal, radioimmunoassay of, effects of bile salts on, 740
Peripheral blood lymphocyte subpopulations, normal, protein kinase activities contrasted with lymphoid cell lines, 56
monocytes, human, specific binding of thrombin by, 873
T cells of renal transplant patients, isolation of human cytomegalovirus from, 92
Personal testament—reflections on the Tower of Babel, 10
Phosphate administration, effects on tubular calcium transport, 317
Phosphoribosylpyrophosphate synthetase, superactive, gout with, due to increased enzyme catalytic rate, 495
Phosphorus, effect on calcium balance in women, 46
pK of triamterene and its metabolites in triamterene urolithiasis, 254
Plasma, human, very low levels of 6-keto-prostaglandin $F_{1\alpha}$ in, 388
lecithin–cholesterol acyl transferase deficiency: heterozygous variant with erythrocyte membrane abnormalities, 816
newborn, activated, decreased chemotactic activity in, role of higher levels of chemotactic factor inactivator and lower levels of complement, 331
renin activity throughout rabbit pregnancy, 239
Plasminogen in hepatic cirrhosis, kinetic and functional studies, 217
Platelet(s) adherence, rabbit, effect of dipyridamole and prostacyclin on, in vitro and in vivo, 548
fibrinogen, and plasminogen in hepatic cirrhosis, kinetic and functional studies of, 217

Platelet(s)—cont'd
human, prostaglandin synthetase, radioimmune assay of, 187
Polycythemic and normal humans, circulating levels of erythropoietin in, radioimmunoassay for, 624
Polyethylene glycol precipitation and particle-counting immunoassay for detecting circulating immune complex–like material in liver cirrhosis and septicemia, 852
Potassium depletion, effect on vasopressin-sensitive cyclic AMP system in rat outer medullary tubules, 29
Pregnancy, rabbit: prostaglandin E_2, plasma renin activity, and renal function throughout, 239
Primates, nonhuman, biliary lipid metabolism and bile flow in, effect of elevated biliary tract pressure on, 342
Procoagulant activity, fibroblast, mononuclear cell modulation of, 657
Progenitor cells, human marrow, testosterone and synthetic androgens improving in vitro survival in serum-free suspension cultures, 247
Prostacyclin and dipyridamole, effect on rabbit platelet adherence in vitro and in vivo, 548
Prostaglandin E synthesis, alterations in, relation to effects of hyperosmolality on calcium mobilization in renal inner medulla, 806
E_2, plasma renin activity, and renal function throughout rabbit pregnancy, 239
synthetase, human platelet, radioimmune assay of, 187
Protein kinase activities among normal peripheral blood lymphocyte subpopulations contrasted with lymphoid cell lines, 56
Proteolysis of excess α-chains in β-thalassemia, 754
Proteolytic activity, abnormal, of red cell membrane in severe heterozygous β-thalassemia, 263
Prothrombin time, spontaneous shortening in women using oral contraceptives, role of augmented Hageman factor (factor XII) titers in, 363
Protoporphyrin, hepatic clearance and biliary secretion of, in isolated, in situ–perfused rat liver, 885
Psoriasis, role for humoral factors in, 275
Pulmonary macrophage, rabbit, filtration deformability of, 568
Purine and pyrimidine metabolism, disorders of, adenine phosphoribosyltransferase in, 163
Pyelonephritis, enterococcal, experimental, in rats, free water reabsorption during saline diuresis in, 474
Pyrimidine metabolism, altered, adenosine- and deoxyadenosine-mediated, in human adenosine deaminase–deficient lymphoblasts, 731
and purine metabolism, disorders of, adenine phosphoribosyltransferase in, 163
Pyrogen, leukocytic, production of, caused by interaction of *Borrelia* spirochetes and human mononuclear leukocytes, 709
Pyroglobulin, IgM-λ, structural studies on, 845

R

Rabbit platelet adherence, effect of dipyridamole and prostacyclin on, in vitro and in vivo, 548
pregnancy: prostaglandin E_2, plasma renin activity, and renal function throughout, 239
pulmonary macrophage, filtration deformability of, 568
Radioimmunoassay of erythropoietin: circulating levels in normal and polycythemic humans, 624
of hormonal peptides, effects of bile salts on, 740
of human platelet prostaglandin synthetase, 187
of parathyroid hormone, current concepts, 309
Rat(s), experimental enterococcal pyelonephritis in, free water reabsorption during saline diuresis in, 474
experimental enterococcal pyelonephritis in, free water reabsorption during saline diuresis in, 474
glomerulonephritis in, effects of antiplatelet drugs and defibrinating agent on, 428
and human kidney, cortical slices of, ^{3}H-gentamicin uptake in, effect of basic amino acids and aminoglycosides on, 156
lead, hypertension, and renin-angiotensin system in, 354
liver, isolated, in situ–perfused, hepatic clearance and biliary secretion of protoporphyrin in, 885
perfused, gluconeogenesis from alanine in, interrelation between effects of ethanol and thyroid hormones on, 746
lung, perfused, relation between reduced alveolar Po_2 and collagen biosynthesis in, 442
outer medullary tubules, vasopressin-sensitive cyclic AMP system in, effect of potassium depletion on, 29
renal failure in, acute, mercuric chloride–induced: effects of water diuresis, saline loading, and diuretic drugs, 646
saline deoxycorticosterone acetate (Doca) hypertension in, lithium preventing, 231
uremic (acutely), livers of, impaired glucagon-stimulated glucose output in, 669
Red blood cell; *see* Erythrocyte(s)
Renal; *see* Kidney
Renin-angiotensin system, lead, and hypertension in rats, 354
Renomedullary lipid, antihypertensive neutral, derivation from renal venous effluent, 64
Replacement therapy, enzyme, long-term, in β-glucuronidase–deficient mice by allogeneic bone marrow transplantation, 792

Respiratory burst, relation to arachidonate metabolism during phagocytosis by guinea pig alveolar macrophages, 908
Rheumatoid factor, monoclonal, and C1q, complexes that interact with, in lupus erythematosus and lung cancer, C1q-latex assay for, 678
Rough mutant (Re) antisera, opsonization of serum-sensitive and serum-resistant *Escherichia coli* by, 197

S

Saline deoxycorticosterone acetate (Doca) hypertension in rat, lithium preventing, 231
diuresis, free water reabsorption during, in experimental enterococcal pyelonephritis in rats, 474
loading, effects on mercuric chloride–induced acute renal failure in rat, 646
Septicemia and liver cirrhosis, circulating immune complex–like material in, polyethylene glycol precipitation and particle-counting immunoassay for detecting, 852
Serum component, degradation of amyloid by, and inhibition of degradation: dynamic concept of amyloid deposition, 693
-free suspension cultures, in vitro survival of human marrow progenitor cells in, testosterone and synthetic androgens improving, 247
lactic dehydrogenase level in Hodgkin's disease, prognostic level of, 382
-sensitive and serum-resistant *Escherichia coli*, opsonization by rough mutant (Re) antisera, 197
Sex, effect on total body nitrogen in health and disease, 917
Sickled (SS) vs. normal (AA) cells, membrane-bound hemichrome in density-separated cohorts of, 25
Solubility of triamterene and its metabolites in triamterene urolithiasis, 254
Spirochetes, *Borrelia*, interaction with human mononuclear leukocytes causing production of leukocytic pyrogen and thromboplastin, 709
Splanchnic blood flow, estimated, effects of digitalis on, 84
Streptococcal lipoteichoic acid, glycolipid region of, cytotoxicity for cultures of human heart cells, 118
Stroke, cerebral vessels in, effects of nerves on, 139
Succinylacetone, immunosuppressive activity of, 526
Synthetic inhibitor of thrombin, in vivo studies of, 76
Systemic immunologic responses, multiple, in animal model of occupational immunologic asthma due to diphenylmethane diisocyanate, 615
Systemic—cont'd
infusion of lactoferrin, neutropenia induced by, 866

T

T cell(s), peripheral blood, of renal transplant patients, isolation of human cytomegalovirus from, 92
suppression, enhanced, directed toward sensitive circulating B cells in multiple myeloma, 512
Testosterone and synthetic androgens improving in vitro survival of human marrow progenitor cells in serum-free suspension cultures, 247
β-Thalassemia, excess α-chains in, proteolysis of, 754
Thiamine transport, intestinal, dual system of, in humans, 701
Thrombin, specific binding by human peripheral blood monocytes, 873
synthetic inhibitor of, in vivo studies of, 76
Thromboplastin, production of, interaction of *Borrelia* spirochetes with human mononuclear leukocytes causing, 709
Thyroid hormone(s) and ethanol, effects on gluconeogenesis from alanine in perfused rat liver, interrelation between, 746
formation catalyzed by human thyroid peroxidase: new and physiological measurement of thyroid peroxidase, 580
peroxidase, new and physiological measurement of, 580
Triamterene urolithiasis: solubility, pK, effect on crystal formation, and matrix binding of triamterene and its metabolites, 254
Tubular calcium transport, effects of phosphate administration on, 317
Tubules, outer medullary, rat, vasopressin-sensitive cyclic AMP system in, effect of potassium depletion on, 29
Tubuloglomerular feedback, activation of, signal for, 722

U

Uremic rats, acutely, livers of, impaired glucagon-stimulated glucose output in, 669
Urinary excretion of 25-hydroxyvitamin D in health and nephrotic syndrome, 325
Urolithiasis, triamterene: solubility, pK, effect on crystal formation, and matrix binding of triamterene and its metabolites, 254

V

Vasoactive intestinal peptide and glucagon, immunoreactivities in leukocytes from leukemic patients, 294, 295, 297
Vasopressin-sensitive cyclic AMP system in rat outer medullary tubules, effect of potassium depletion on, 29
Venous effluent, renal, derivation of antihypertensive neutral renomedullary lipid from, 64

von Willebrand's disease, variants of, abnormal antigenic reactivity of factor VIII/von Willebrand factor subunit in, 481

W

Water diuresis, effects on mercuric chloride–induced acute renal failure in rat, 646
free, reabsorption during saline diuresis in experimental enterococcal pyelonephritis in rats, 474
transport, renal tubular, alterations in, induced by parathyroid hormone: both antidiuretic hormone–mediated and independent effects, 457
Weight, effect on total body nitrogen in health and disease, 917
Women, biliary lipids, bile acids, and gallbladder function in, effects of contraceptive steroids, 798
calcium balance in, effects of nitrogen, phosphorus, and caffeine on, 46
using oral contraceptives, cold-promoted activation of factor VII and spontaneous shortening of prothrombin time in, role of augmented Hageman factor (factor XII) titers in, 363
